DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 38-40 and 43-44 rejected under 35 U.S.C. 102(e) as being anticipated by US 6,122,898 (De Kort). De Kort teaches a first processing roller and a second processing rolling having a working gas (figure 2a, rollers); means for inserting the substrate in a feed direction (figure 1, item 6); tool parts cooperating with at least one of the first and second processing rollers to process the substrate in said working gap (figure 2, item 20); means for register controlled transport of the substrate using at least one first gripper cooperating with one of said first and second processing rollers (figure 2, item 24); and a disposal device located downstream of the working gap for collecting processing waste (figure 2, item 9); wherein the first and second processing rollers feed a downstream second gripper acting on the substrate, said downstream second gripper disposed in one of a delivery roller, a transfer roller, and a discharge device (figure 2, item 24); where the delivery roller and transfer roller effects transfer together with at least one downstream conveyor belt and said discharge device to accept the substrate and/or waste (figure 1, items 25); wherein to support separation of waste from the substrate, the disposal device comprises at least one vacuum suctioning unit and a pressurized air system

facing the first and second processing rollers (figure 2, item 29); where the discharge device comprises a table, said table having an upper side which accepts and removes a finished piece and with a receiving end defining a passage gap together with a lower one of said first and second processing rollers, said passage gap for downwardly directed passage to said disposal device of a waste portion resulting from punching (figure 2, item 9).

Response to Arguments

Applicant argues De Kort involves producing flow packs. The examiner agrees.

Applicant goes on to argue that De Kort does not teach the claim 38 limitation of "a disposal device located downstream for collecting waste" because De Kort teaches the use of flow packs, which cannot be considered waste. The examiner disagrees. It is the examiner's position that the disposing function is merely an intended use that holds limited patentable weight in an apparatus claim. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. See In re Casey, 152 USPQ 235 (CCPA 1967) and In re Otto, 136 USPQ 458, 459 (CCPA 1963).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1725

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
